

3.348 μ m low-power ICL-DFB tunable continuous wave laser (pure drive Benchtop light source) 5mW

● Product Description

The MP-ICL-3348-DFB-5-B laser is a tunable continuous-wave laser developed by Idealphotonics . It features a narrow linewidth, high power, and low power consumption, making it ideal for gas sensing tests, especially for detecting hydrocarbons and other related gases. Additionally,

the desktop ICL-DFB laser module integrates a driver and temperature control module. It can be controlled via software to adjust the laser's temperature and operating current, ensuring stable operation and maintaining measurement accuracy. The laser module also includes an optional FPGA (available for an additional fee) to facilitate the processing of gas concentration measurements.
